

# San Joaquin Valley Air Quality Permitting, Title V, and Compliance

## Course Description

This course is designed for industry and government professionals as an overview of the EPA, CARB, and SJVAPCD air quality regulations that apply to the permitting process. In addition, the course will review the regulations that apply to ongoing air quality compliance for facilities and specific source categories.

**Instructor Information: Judy B. Yorke, P.E., C.P.P.; e-mail: [JYorke@YorkeEngr.com](mailto:JYorke@YorkeEngr.com)**

Judy Yorke, B.S., PE, CPP, President of Yorke Engineering, LLC, has extensive air emission regulatory compliance experience with industry and government. Ms. Yorke is a recognized expert in federal, state, and local air pollution control regulations. She has taught the *Air Quality Permitting and Compliance* course at the University of California Irvine Extension for over 15 years and is a regular speaker at air quality seminars. She has performed hundreds of air quality projects in the California requiring auditing, permitting, emission quantification & inventories, as well as compliance management/planning.
